- The HD3000 is VCON's newest and most advanced set-top conferencing system combining videoconferencing, streaming video and multipoint conferencing all in one. Provides TV-like video quality using advanced video standards. Multipoint conferencing capabilities via an embedded 4-port MCU. Incorporates HD Simulcast technology for advanced streaming capabilities. Web-based manager makes the HD3000 easy to control and administer. VCON PacketAssist architecture for advanced Quality of Service over IP.
- The Media Xchange Manager (MXM) is at the heart of VCON's integrated conferencing and collaboration solution. It offers centralized management and administration features for the total control and high availability. Web-based scheduling and moderation with
- VCON Conference Moderator including Outlook calendaring, chair-control and web-based data conferencing.
- The vPoint HD is VCON's latest software client for personal conferencing. Vpoint is a low-cost, high quality IP videoconferencing for the desktop.
